Project Documentation

► [Project Information](#)

Welcome to the Sample Project, we hope you enjoy you time on this project site. We've tried to assemble some great user documentation and developer information, and we're really excited that you've taken the time to visit this site.

What is Sample Project

Well, it's easy enough to explain. This sample project is a sample of a project with a Maven-generated site from Maven: The Definitive Guide. A dedicated team of volunteers help maintain this sample site, and so on and so forth.
